Introductory NLP for Phishing
Detection

2022 Data science and machine
learning bootcamp

R (Basic)

Certificate of completion: Claude
code 101

Publications

Skin Disease Recognition using
AutoML and CNN

Dhaval Jariwala

Data & ML @WisrAI

Greater Vancouver Metropolitan Area

Summary

I'm a data and AI enthusiast passionate about transforming complex data into intelligent, scalable solutions.

My experience spans data engineering, analytics, and LLM-based applications, where I build automated pipelines, create interactive dashboards, and develop multi-agent systems that enhance decision-making and productivity.

I enjoy working at the intersection of AI, data, and software engineering — combining cloud technologies, Python, SQL, and visualization tools to deliver practical, data-driven insights.

Currently, I'm exploring LLM agent architectures, AI automation, and knowledge graph-driven intelligence to push the boundaries of what data systems can achieve.

Experience

Wisr AI

Data Scientist

February 2025 - Present (1 year 3 months)

Vancouver, BC

- Conduct research and data alignment across diverse datasets — including firmographic, technographic, vulnerability, news, sentiment, and dark web sources — to strengthen Wisr's agentic third-party threat intelligence platform.
- Performed CVE look-alike and KEV conversion timeline analyses, investigating relationships between CVE, KEV, CWE, and CPE, CVSS and EPSS datasets to enhance vulnerability clustering and exploit prediction.
- Explored research papers and competitor solutions to pinpoint capability gaps and emerging approaches in vendor risk and threat intelligence, helping refine Wisr's product direction.
- Supported front-end integration by coordinating with the React UI and API teams to visualize insights ensuring data pipelines feed clean, digestible outputs for POC's and demos.

- Supported Wisr.ai product showcases at WebSummit and the All-In Conference, preparing data visualizations and narratives that highlight the platform's threat intelligence capabilities.

WordOut Inc.

Data Scientist

January 2025 - September 2025 (9 months)

Vancouver, British Columbia, Canada

- Build LLM features for a platform that helps candidates showcase communication skills and work through short, portfolio-style videos for hiring teams.
- Prototype multi-agent resume & career-development workflows (profile ingest → critique → rewrite → video pitch prompts → recruiter summary).
- Host and orchestrate LLM services on Firebase, handling auth, data flow, and prompt/version management.
- Partner in rapid product brainstorming and UX experiments to improve candidate storytelling and hiring-manager signal.

Northeastern University

Graduate Teaching Assistant

September 2024 - December 2024 (4 months)

Vancouver, British Columbia, Canada

IE 6700 – Data Management for Analytics

ENCP 6000/6100 – Career Management for Engineers

- Assisted course instructors with grading assignments, providing feedback, and supporting students in mastering data management, SQL, and analytics concepts.
- Conducted 1:1 advising sessions to guide students on career strategy, resume and LinkedIn optimization, and job search best practices.
- Offered mentorship and technical support, helping students connect academic learning with practical, industry-relevant skills.
- Supported classroom instruction and discussion facilitation, fostering an engaging and supportive learning environment.

TransLink

Student Engineering Assistant (Data Engineer)

January 2024 - August 2024 (8 months)

New Westminster, British Columbia, Canada

- Supported migration of on-prem SQL Server databases to Azure Data Lakes, leveraging SSIS and Azure Synapse to improve scalability, performance, and data accessibility.
- Designed and developed interactive Power BI dashboards for real-time monitoring of device events, enabling data-driven insights into customer behavior, usage trends, and system performance.
- Designed and automated an end-to-end fare infraction data reporting workflow—from Excel ingestion through SSIS and SQL Server to Power BI dashboards powered by Power Query and DAX—delivering always up-to-date insights and saving 4 days of manual work each quarter.
- Contributed to an engineering capital project by configuring and testing RFID IoT devices for Accessibility Gates, supporting deployment and performance monitoring across transit stations.

zaveribazaar.co.in

Flutter Developer

June 2021 - July 2022 (1 year 2 months)

Mumbai, Maharashtra, India

-Led the development to revamp the User Interface using Flutter, improving the user experience and engagement. Updated layouts to meet usability and performance requirements, which led to a 30% increase in daily active users

- Identified and Resolved bugs with User Authentication and Firebase Cloud Notifications by providing a local storage using SQLite

-Integrated REST APIs to develop features such as Expense Manager and Content-Based Recommendation System using Tensorflow and Firebase Analytics to personalize product suggestions

-Deployment on Android and iOS with a CI/CD pipeline using Codemagic

Bluepen.co.in

Software Developer

November 2020 - May 2021 (7 months)

Mumbai, Maharashtra, India

- End-to-end designing and development of the User Interface using Flutter, integrating modules such as TensorFlow to perform Realtime Object Detection, Google maps api, and State Management using BLoC

- Created the microservice-based backend using Flask to serve APIs for account management and serving data from a NoSQL (MongoDB) store, allowing other systems to leverage this data.

- Integrated Razorpay payments gateway to enable a subscription model for users

Happy Bubbles

Web Development Intern

October 2019 - December 2019 (3 months)

Mumbai, Maharashtra, India

- Collaborated towards the tech development intern team to deploy a fully functional and dynamic website replacing their previous static website.

- Functionalities added were php backend, admin panel with features like events and project management, volunteer management, and payment gateway integration using RazorPay

- Deployed website using Cpanel

Education

Northeastern University

Master of Science - MS, Data Analytics Engineering · (September 2022 - December 2024)

University of Mumbai

Bachelor of Engineering - BE, Computer Engineering · (August 2017 - October 2020)

Shri Bhagubhai Mafatlal Polytechnic

Diploma, Computer Engineering · (August 2014 - June 2017)
